Career Objective

Computer Science student specializing in web and network penetration testing and vulnerability assessment. Hands-on experience with security testing through DEPI training, TryHackMe labs, PortSwigger Web Security Academy, and vulnerability research. Skilled in identifying, validating, and assessing security weaknesses using tools such as Burp Suite, Nmap, and Metasploit, with a strong interest in helping organizations identify and reduce security risks.

Education

Assiut University

- Computer Science (Computers and Information)
- Expected Graduation 2027
- GPA 3.16

Experience

Vulnerability Analysis and Penetration Testing Student Intern
Jul 2026 - Present
Digital Egypt Pioneers Initiative (DEPI), *Alexandria, Egypt (Hybrid)*

- Apply **web and network penetration testing** techniques to identify and validate security vulnerabilities.
- Perform **vulnerability assessment and security testing** to evaluate weaknesses in applications and network environments.
- Use security testing tools such as **Burp Suite and Nmap** for reconnaissance, vulnerability discovery, and validation.
- Analyze identified vulnerabilities to understand their potential **security impact and risk**.

Trainee
Aug 2025 - Sep 2025
National Telecommunication Institute (NTI), *Cairo, Egypt (Remote)*

- Completed **90 hours of technical training in network infrastructure**, covering core networking protocols and secure network management.
- Developed foundational knowledge of **network infrastructure, network security, and troubleshooting.**
- **Completed 30 hours of soft skills training focused on communication, problem-solving, and workplace collaboration.**

Courses and Certificates

- Introduction to OSINT - Security Blue Team
- Delivering Quality Work with Agility - IBM
- Computer Network Fundamentals - Mahara-Tech
- Network Infrastructure - NTI
- Pre-CyberSecurity – NETRIDERS

Skills

- **Offensive Security:** Web Penetration Testing, Network Penetration Testing, Vulnerability Assessment, Vulnerability Validation, Security Testing.
- **Tools & Frameworks:** Burp Suite, Nmap, Metasploit (msfconsole, msfvenom), OWASP Top 10, CVSS Risk Scoring.
- **Programming & Automation:** Python, C#, PHP, JavaScript (Node.js), SQL, Bash, Prompt Engineering
- **Systems & Infrastructure:** Linux Administration, Windows CLI, PowerShell, Active Directory, Network Infrastructure.

Projects

Password Manager CLI (Python) https://github.com/Saif-Aldeen04/Passwordy

- Developed a command-line password manager using **Python** for storing, editing and retrieving passwords.
- Implemented **Caesar cipher encryption** to protect stored password data.
- Designed a CLI-based workflow for managing stored credentials.

Extracurricular Activities

Instructor
Sep 2025 - Mar 2026
Helpers AU, Assiut

- Taught hands-on cybersecurity and soft skills to students using practical, real-world examples.
- Explained technical cybersecurity concepts and supported students in developing practical skills.
